In this post I share a 4-step rendering workflow that has worked well for me with my mobile users. It is structured to be adopted for both Windows and Mac desktops. 1. Resize Image This is a key step that can drastically reduce rendering time. \*\*Step 1:\*\* \*\*Get and render the image\*\* 2. Adjust Viewport \*\*Step 2:\*\* \*\*Adjust viewport\*\* 3. Set up Light and Camera \*\*Step 3:\*\* \*\*Set up light and camera\*\* 4. Rerender \*\*Step 4:\*\* \*\*Rerender\*\* Here is a screenshot of the results: [![[Screenshot of results]]] (The 4-step rendering workflow is available for free on the cloud. 82157476af
